

Hermes

Text A.Crowley music: Dănu Extrem © SUIA

I don't know who i am
I don't know whence i come
I don't know where i go
I seek but what i don't know
I am blind and i am bound
But i have heard the one cry
Ring through eternety
Arise and follow me...

O light in light - O flashing wings of fire
O Hermes messenger of gods - Descend abide!

At the ending of the light
At the limits of the night
Stood mercury before the ones
The unborn ones of time
Then was formulate the universe
Then came forth the Gods thereof
The aeons of bornless beyond
Then was the voice vibrated

O light in light - O flashing wings of fire
O Hermes messenger of gods - Descend abide!

Then was the name declared
At the threshold of the entrance
In the sign of the enterer
Stood mercury as before him
The aeons were proclaimed
In symbols did he record them
In breath did he vibrate them
For between the light and darkness

O light in light - O flashing wings of fire
O Hermes messenger of gods - Descend abide!

the fear of hell the dead breath
the fear of him the demon dire
the fear of darkness and of death
the fear of water and of fire
the fear of hell the dead breath
the fear of him the demon dire.
