

So far (with you)

text&music: Dănu Extrem © SUISA

It's long ago but i remember
This special day then in november
I met you there in this office room
And i could hear my heart making 'boum'

We went together for quite some time
And all in all I think we made it fine
Together we went throu all bat and good
You knew I was here and I understood

Cos I, I never gave that much before
No I, I never went that far before

I brought you rose and we drank Champagne
You gave me all the pleasures and some pain
And i was faithfull to you all this years
You could have trust me and forget your fears
I wrote you letters full of sweet romance
And i forgave you all your arrogance
I really loved you just the way you where
With you I would have gone to everywere

'cos I, I never gave that much before
No I, I never went that far before

But then i called you sometimes late at night
And this was all it took to make you mad
You came and throw bad lies into my face
You sayed that i was just a hopeless case
You spittted on me you treated me like shit
You did not care not even just a bit
That you just lost the chance to have me all for you
Because now i know and it's because of you

That I, I never go that far again
I, I just can't stand that pain again
No, I never loose my brain again
I'll never fall in Love again..
